

Installation Manual

Lay down the towels to protect against damage to the vessel sink. Be careful and place the sink upside down.

Apply the silicone around the drain hole at the bottom of the sink.

Turn the sink over, install it over the drain hole. Wipe off the excess silicone at the bottom of the sink.

Now we are ready to install the drain, apply the silicone to the underside of the drainage equipment.

Pressing the drain to the drain hole, and Wrap gasket and locknuts, tighten with Channellock wrench.

Wipe off the excess silicone around the drain. Allow the silicone to dry for 24 hours.
