

MEASURING GUIDE

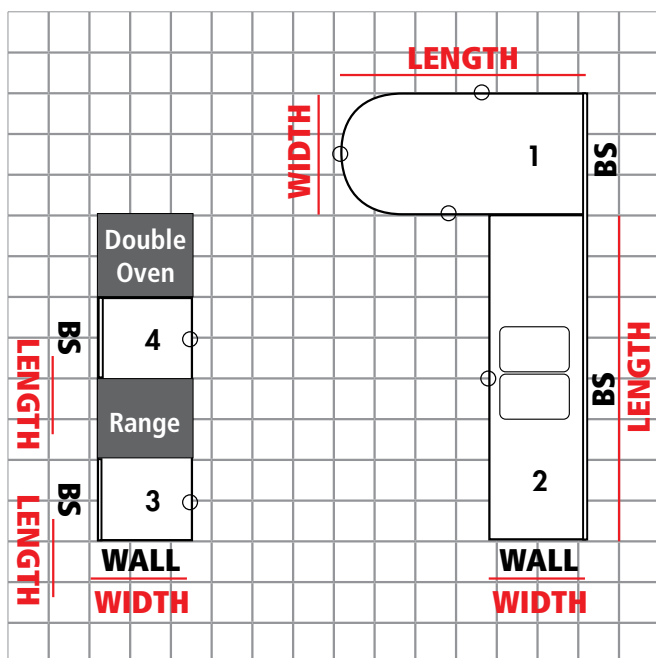

Gathering measurements is the first step in selecting the right quantity and type of materials for your space. Use the graph paper attached to draw a space configuration for any room. Bring your measurements with you for your next Floor & Decor visit and Design Services appointment. We're here to help you get started!

TIPS

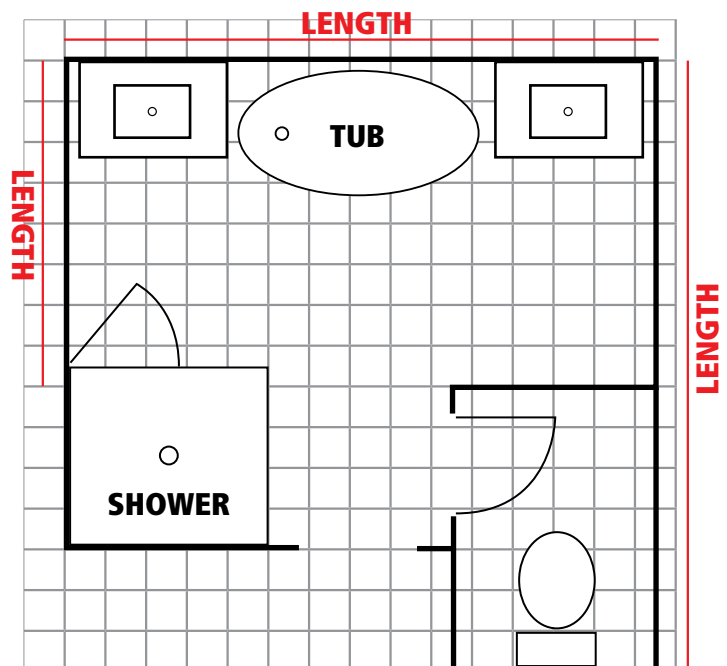

- Round all numbers to the nearest half-inch
- Each square on the graph paper represents 1' x 1'
- Using the graph paper, draw the layout of your space to scale
- Label sinks, appliances, fireplaces, windows, etc.
- Identify areas where there are walls and backsplashes are needed
- Take photos of the space for more accurate product recommendations
- For custom countertop projects, click here for the [Countertop Measuring Guide](#)

EXAMPLES

Kitchen

Bathroom

*Add flooring parameters; include shower, tub and vanities for bathroom example

MEASURING WORKSHEET

1/4" SCALE

1 Square = 1 Foot
