VAPOR BARRIER
A 6mil poly vapor barrier is required for all hybrid resilient, vinyl, and laminate brands when installing over a concrete subfloor.

UNDERLAYMENT

Sentinel Protect Plus is recommended for all hybrid resilient, vinyl, and laminate brands that have an attached pad. Eco Ultra Quiet® or Sentinel Premium Quiet™ is required for HydroShield®, Hampstead®, and Fair Oaks®.

LIGHT
PROTECTION

TECHTANIUM PLUS:
High-performance coating that acts as a physical barrier, delivering 2X the scratch resistance vs. leading 22mil wear layer alternatives.

WEAR LAYER:
Defines areas of use from a standard 6 mil (moderate residential traffic) to 30 mil (heavy residential and commercial traffic).

AC RATING:
Abrasion Classification (AC) ratings define area for use and range from AC4 (light use home setting) to AC5 (high traffic commercial setting).

WHISPERCORE:
Acoustically enhanced core that has been tested to the highest industry standards.

All listed products are
GREENGUARD Gold Certified
