

# VINYL & RESILIENT CARE & MAINTENANCE GUIDE

For Vinyl, Luxury Vinyl Plank & Tile, and Resilient Flooring

## CLEANING TOOLS

Vinyl and Resilient flooring can be cleaned using a broom, damp mop, dust mop with soft bristles, jet mop, dry mop, steam mop on the lowest setting for residential use, or a vacuum without a beater bar. Always refer to your product's warranty and installation guide for additional instructions.

## RECOMMENDED CLEANER

When mopping Vinyl or Resilient floors, only use pH neutral, non-abrasive cleaners that are specifically formulated for vinyl flooring. Do not use cleaners that contain ammonia, bleach, oil, polish, strong alkaline cleaning agents and solvents, or wax.

## STAIN PROTECTION

To prevent staining, wipe spills immediately with a microfiber cloth and cleaner specifically formulated for vinyl floors. Additionally, promptly clean any standing water, pet urine, or other liquids.

## PREVENTATIVE MAINTENANCE

The best way to maintain your Vinyl and Resilient floors is to protect them from scratches. Never slide, drag, or roll heavy furniture or appliances across the floor and consider using protective sheets when using a dolly to move furniture.

In high traffic areas, use area rugs without rubber.

Use nylon or felt protection pads under all furniture legs and periodically clean the pads for any buildup that may cause scratching.

Avoid wearing shoes with spikes, cleats, or sharp heels, and for best results, ensure pet nails are trimmed to help prevent damage.

**PRO TIP:** It is also recommended that cleaners, treatments, and sealers are tested in a small, isolated area to ensure desired results.

\*Since every application is different, the suggestions mentioned above are general recommendations only. Please be sure to follow all guidelines set in your product's installation guide and warranty.
